DISCOVER THE MACHINES POETRY

THE CALAIS DRAGON

The Calais Dragon is a structure made of steel and carved wood, with movements inspired by reptiles. A creature of sea, land, fire, and air, it breathes fire, smoke, and water in various forms. Highly expressive, it features moving eyes, eyelids, ears, mouth, tongue, and fins! Incredibly agile, it can lie down, stand up, run at speeds of up to 4 km/h, and flap its wings made of thick canvas. Measuring 12 meters high and 25 meters long, it can be seen year-round parading along the Gaston Berthe seawall, standing watch over the seaside town of Calais.

TRAVEL ABOARD THE CALAIS DRAGON !

Embark on a unique journey aboard the Dragon. Climb up its tail and step onto the covered panoramic platform built into its back. You'll enjoy a 45-minute ride at the rhythm of this extraordinary creature, offering breathtaking views of the sea and the beach of Calais.

BECOME A MACHINIST

Discover the fascinating job of a machinist by taking control of the console and its six joysticks to bring our Sentinel Iguana to life, proudly perched on its sunlit rock.

SAT.
21
